Day Care Center Management System (DCCMS)

Barangay San Antonio de Padua I

A simple and reliable system for managing student records, attendance, and reports.

About the System

The Day Care Center Management System (DCCMS) replaces manual record-keeping with a digital solution. It improves efficiency, reduces paperwork, and ensures accurate tracking of children's development.

WHO WE ARE

The Day Care Center Management System (DCCMS) team is a group of student developers dedicated to creating practical, community-centered digital solutions. This project was developed in collaboration with the Day Care Center of Barangay San Antonio de Padua I, Bacoor, Cavite, as part of a service-learning initiative.

Our goal is to bridge the gap between technology and community needs by designing systems that are accessible, efficient, and easy to use—even in environments with limited resources.

OUR MISSION

We aim to improve the daily operations of daycare centers by providing a simple, reliable, and offline-capable system that enhances record management, reduces workload, and supports better communication between teachers and parents.

OUR VISION

We envision a future where local daycare centers can transition from manual processes to organized digital systems, enabling them to deliver better services, ensure data security, and focus more on child development rather than administrative tasks.

WHAT WE DO

DCCMS is designed to support daycare personnel by:

- Digitizing student records for faster and more accurate data access
- Simplifying attendance tracking and daily monitoring
- Automating report generation for submissions to CSWD and other offices
- Providing announcements and updates for parents and guardians
- Ensuring accessibility through offline functionality

OUR APPROACH

- Simplicity – easy to learn and use
- Accessibility – works even without internet
- Efficiency – reduces manual workload
- Security – protects sensitive information

OUR COMMITMENT

We are committed to developing a system that is not only functional but also meaningful to its users. By aligning technology with the actual needs of the daycare center, we strive to create a solution that improves productivity, supports educators, and ultimately benefits the children and families they serve.

OUR PARTNERS

This project was made possible through collaboration with:

- Day Care Center Personnel of Barangay San Antonio de Padua I
- Barangay Officials
- Parents and Guardians
- CSWD and Regional Offices
